

CURAPROX

Visit the Curaprox experts on stand C12 at The Dentistry Show 2014

Discover what leading oral healthcare expert Curaprox has to offer at The Dentistry Show 2014. Visit the team from Curaprox on stand C12 to watch live tooth brushing demonstrations by the iTOP (Individually Taught Oral Prevention) tutors and step up to their challenge to win a year's supply of the CS5460 ultra soft toothbrush! With its special, brace-friendly groove, the CUREN® filaments clean brackets, teeth and gums gently and carefully, with outstanding results. The product experts at Curaprox will also be on hand to detail the comprehensive range of interproximal cleaning products, toothbrushes, toothpastes and mouthwashes available. In particular, the team will be showcasing the CPS Prime range of interdental brushes, which lasts up to five times longer than any other on the market, the Hydrosonic Electric Toothbrush, which produces 42,000 sonic waves per minute and the Curasept ADS® range. These products contain chlorhexidine and offer all the benefits without any of the possible side effects. Snap up your free samples at each pod! To discover the solutions available to keep your patients' mouths healthy and much, much more, make sure you visit the Curaprox team on stand C12 at The Dentistry Show.

For more information please call 01480 862084, email info@curaprox.co.uk or visit www.curaprox.co.uk

Denplan – Helping you achieve your business goals

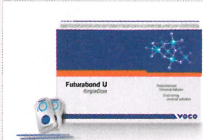

Every practice deserves the efficient dedication of a business partner that understands its

needs. Denplan not only operates seamlessly with your practice, but we're proud to be at the top of our game when it comes to innovation, regulation and value-added services.

Denplan welcomes you to stand E40 to show how we use more than 27 years experience of working with the whole practice team to support you and help your practice grow and develop.

Plus, our nationally recognised consumer brand can help you recruit and retain patients and our extensive range of business, marketing and financial services help make your practice more profitable.

For more information, come along to stand E40 or call 0800 328 3223.

Futurabond® U Dual-curing universal adhesive

Futurabond U is the market's only true dual-curing universal adhesive offering usage in a disposable applicator. Besides the incredibly simple handling of SingleDose the new Futurabond U offers practitioners an outstanding range of options for application, as much with regard to

indications as to selection of the etching technique (self-etch, selective-etch or total-etch) or the curing mode. This universal adhesive is fully compatible with all light-curing, dual-curing and self-curing methacrylate-based composites and is suitable for both direct and indirect restorations. Applied in a single layer, Futurabond U creates a strong bond to enamel and dentine, thus ensuring a durable, gap-free bond between the dental hard tissue and the restorative material. At the same time it offers firm adhesion to different materials such as metal, zirconium/aluminium oxide and silicate ceramics without any additional primer.

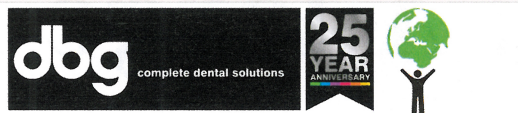

Special offer: buy one pack of 200 SingleDose and get a Trial Pack of 20 SingleDose for free, all with a payback guarantee. This offer is available until 31st March 2014. Please ask your VOCO dental consultant or contact your dental dealer.

MC Repairs Ltd Repairs you can trust...

With over 25 years' experience in the dental handpiece repair industry, MC Repairs Limited offer a reliable, efficient and extremely competitively priced handpiece repair service with a 24 hour turnaround in most cases. They are confident that they are the best value repair centre in the UK. Manufacturer trained, their team of Repair Technicians have experience of repairing handpieces, motors, scalers and couplings from all the major manufacturers including Bien Air, Castellini, Kavo, MK Dent, NSK, Star, Lares, Sirona and W&H. They also repair handpieces etc from other manufacturers too. MC Repairs offer a Freepost Service and free no obligation quotations on all their repairs, so it does not cost the Practice a penny until they accept the quote. All repairs are quoted the day they are received and the vast majority are returned within 24 hours of acceptance, so there is no need for the instrument to be away from the surgery a minute longer than necessary.

For further information telephone 01253 404774 or visit www.mcrepairs.co.uk where you can download a Freepost label and also see the various equipment items they offer for sale.

Complete recruitment solutions from dbg

At dbg we aim to provide our members with complete solutions covering everything from training and compliance to engineering, materials and equipment. Honigum-MixStar Heavy Straumann's & Brånemark's material of choice

DMG UK's Honigum-MixStar Heavy has been selected by Brånemark & Straumann as their material of choice for implant impressions. At the Brånemark Centre they treat every type of implant case from simple single tooth to the most complex cases. They continuously

evaluate every stage of treatment in order to find the optimal combination from osseointegration to optimal precision of the prosthetic reconstruction. Their conclusion is that Honigum-MixStar Heavy is the material of choice, best fulfilling the demands for precision and handling. Featuring DMG's patented Honigum Technology, Honigum-Mixstar Heavy contains a unique microcrystalline wax matrix. This rheologically active matrix combines with its unique "Directed Flow" characteristic to facilitate unprecedented flow even in problem areas. Together they offer the benefits of exceptional precision, exact margin reproduction, thixotropic non-dripping consistency, easy removal, distortion free storage, neutral taste and honey scent. Honigum-MixStar Heavy is designed for use in combination with DMG's MixStar and MixStar-eMotion automatic mixing units, and other similar machines.

For further information contact your local dental dealer or DMG Dental Products (UK) Ltd on 01656 789401, fax 01656 360100, email info@dmg-dental.co.uk or visit www.dmg-dental.com

Customise Your Dentures

Dentures can quickly and easily be customised with natural shades using GC's Gradia Gum and GC's Primer.

GC's Ceramic Primer two component bonding system has been developed specifically for bonding ceramic or composite

interfaces in 6 simple steps without the formation of marginal gaps.

The simple bonding process using GC Ceramic Primer involves painting the mixed GC Ceramic Primer onto the roughened and sandblasted surface, gently air dry followed by the application of the mixed Composite Primer, light cure for 1 minute in a Labolight III and it's ready for application of Gradia Gum.

The cold handling method of applying GC Ceramic Primer means that the metal/acrylic is not exposed to any unnecessary heat, which may cause damage.

Gradia Gum is particularly indicated for implant superstructures and for other fixed or removable prosthesis. Displaying outstanding physical properties, natural appearance and easy handling Gradia Gum is certainly the material of choice.

For further information please contact GC (UK) Ltd on 01908 218999.

Midmark Announces the Elevance™ Continental Delivery Unit

Midmark Corporation recently announced the Midmark Elevance™ Continental Delivery Unit, the newest addition to the Midmark Elevance™ family of products. The new unit offers all the features of the traditional Elevance™ delivery unit in a new, ergonomic design that provides a

greater range of positioning. Transthoracic positioning allows minimal reach for the clinician, while the unit can also be positioned to the patient's right (or left) shoulder and remain ergonomically correct for the clinician. The continental delivery unit features a unique, patent-pending whip arm, designed to mimic a spine, which provides an easy range of motion in any direction, ensuring maximum flexibility. Like the traditional Elevance™ Delivery System, this new delivery unit features a unique Integration Control Module® (ICM) that allows control of all components from one centrally-mounted location with digital controls for more precise air pressure and water flow. By offering five utility presets for up to three unique users on each delivery head, Elevance™ Delivery Systems eliminate the need to adjust settings multiple times during the day.

For more information about the Midmark Elevance™ Continental Delivery Unit, please visit midmark.com/Continental. For information regarding other Midmark dental products, please contact your local Midmark distributor or visit www.midmark.com.

EndoCare – saving teeth is what we do!

At EndoCare we aim to become a valuable extra member of your team, helping

and assisting you with any aspect of Endodontic treatment. We welcome all contact from referring practices, and we are more than happy to discuss cases, and offer our support in any way we can.

Among our range of services, we are happy to take referrals for anything from post removals to advanced microsurgery techniques. We particularly excel in treating anxious patients and dealing with anaesthetic problems and other challenging issues, such as hot pulp and re-treatments.

When your patients visit us we aim to treat them in the same manner we would expect to be treated ourselves – with warmth, compassion and honest empathy. A member of our team will always be on hand to answer any questions or address any concerns the patient may have, and we will aim to make each patient's time with us as pleasant and as comfortable as possible.

To find out more about our range of referral services, and how we can become a valuable extra member of your team, contact EndoCare today.

For further information please call EndoCare on 020 7224 0999 Or visit www.endocare.co.uk

Genplan – putting quality dental care within the patient's reach

Ever dedicated to providing quality dental care for everyone, Genix Healthcare is soon to launch its newest payment scheme that will make regular check-ups affordable, even outside the NHS.

Genix Healthcare's Gencare Payment Plan is a scheme that covers twice-yearly check-ups, which include X-rays and a scale and polish. Its premiums will be priced much lower than the average monthly dues of other payment plans.

The Gencare Payment Plan will also offer its members significant discounts on any routine or cosmetic treatments they might require such as root canals, fillings, tooth whitening and more. And families who sign up for the plan will receive free check-ups for children 6 years and younger.

Preventive dental care is a great way of raising the overall quality of oral health in the country. And with this in mind, Genix Healthcare will always come up with new ways to make a healthy quality of life affordable for everyone.

For additional information please call 0845 838 1122, or email advice@genixhealthcare.com or visit www.genixhealthcare.com
