

## The Florida Probe from Clark Dental

USING the latest digital technology, The Florida Probe provides an audio commentary as you carry out your periodontal exam. With each probe you will be informed of important markers such as pocket depth – you get to hear the results as they are recorded and your patient does too! Even comprehensive periodontal exams can be completed in as little as 10 minutes; and no need to estimate pocket depth – the device does it for you.

Each exam can be customised to the case at hand, the advanced charting system allows far greater accuracy and you can compare results with previous exams at the click of a button.

For more information, call 01268 733146, e-mail [info@clarkdental.co.uk](mailto:info@clarkdental.co.uk) or visit [www.clarkdental.co.uk](http://www.clarkdental.co.uk).

## Award-winning products to be demonstrated at BDA

CARESTREAM Dental can streamline your practice processes with the R4 Clinical+ practice management software, enhance patient consent with the eSignatures module, or provide a more flexible patient service with CS Solutions, which will be on display both on its stand and within the Innovation Zone on the trade floor.

You can also discover the innovative CS 8100 OPG Unit, as well as the brand new CS 8100 3D, which delivers high-quality 3D images for everyday practice use through compact, easy-to-use technology.

To find out more, visit Carestream Dental on stand B21 at the BDA Conference and Exhibition 2014, call 0800 169 9692 or visit [www.carestreamdental.co.uk](http://www.carestreamdental.co.uk).

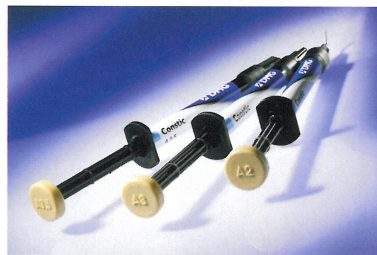

## New flowable composite – ideal for MID

DMG's new Constic self-etching and adhesive flowable composite combines etching gel, bonding agent and flowable composite in one product, saving time and reducing post-operative sensitivity.

As well as treating MID restorations including small Class I restorations and base linings in adults and children, light-cured Constic can be used for fissure sealing, repairing existing restorations and blocking out undercuts.

Available in six shades (A1, A2, A3, A3.5, B1 and Opaque-White) Constic is radio-opaque with a tooth-like fluorescence. Independent studies have demonstrated superior shear bond strengths for Constic to enamel and dentine compared with other self-etching, self-adhesive flowable composites.

For further information, contact your local dental dealer or call 01656 789401, fax 01656 360100, e-mail [paulw@dmg-dental.co.uk](mailto:paulw@dmg-dental.co.uk) or visit [www.dmg-dental.com](http://www.dmg-dental.com).

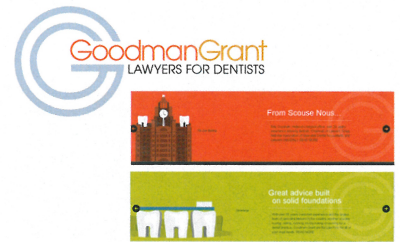

## Goodman Grant's new website

GOODMAN Grant has launched its new, improved website. Refreshed and intuitive to use, [www.goodmangrant.co.uk](http://www.goodmangrant.co.uk) is a great first port of call for any dentist seeking legal support, containing guidance on a number of specialist legal matters from practice sales and purchases to regulatory issues.

And the new website is easy to navigate, making it quick and painless for clients to find the information they need and to make contact.

Ray Goodman or John Grant of Goodman Grant – lawyers for dentists – are NASDAL and ASPD members.

For more information call Ray Goodman on 0151 707 0090, e-mail [rng@goodmangrant.co.uk](mailto:rng@goodmangrant.co.uk); or John Grant on 0113 834 3705, e-mail [jmg@goodmangrant.co.uk](mailto:jmg@goodmangrant.co.uk). Visit [www.goodmangrant.co.uk](http://www.goodmangrant.co.uk).

## ESAO – training from orthodontic experts

AFTER the success of last December's course, the European Society of Aesthetic Orthodontics will run two parallel courses on 21st June – one designed for dentists and one tailored toward dental nurses. Delegates will learn how to deliver aesthetically focused orthodontics in a safe and ethical way.

Attendees to the dentist course will have the opportunity to practice interproximal reduction on typodonts and explore topics from accessing joint abnormality to accessing occlusion, incision edge bonding, composite laying techniques and effective retention protocols to avoid relapse.

Delegates on the dental nurses' course will be instructed on how to take impressions, the safe removal of retainers and taking effective orthodontic photographs.

For more information, visit [esao.co.uk](http://esao.co.uk) or e-mail [esao@esao.co.uk](mailto:esao@esao.co.uk).

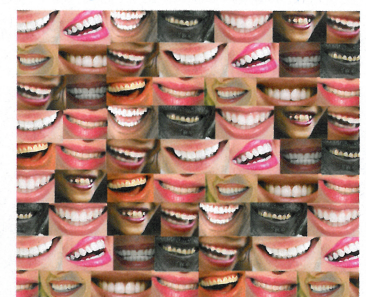

## In 10 years we've saved over 10,000 teeth

AT EndoCare we understand just how valuable a tooth can be. In 10 years we've saved over 10,000 teeth, avoiding extraction, leaving our patients happy and pain-free. Our warm, friendly team are dedicated to treating dental pain and infection in all its forms.

To ensure your patients receive the very best care possible, we work closely with all our referring colleagues and will keep you updated through every stage of your patient's time with us. Indeed we welcome all contact, and we are more than happy to discuss cases and offer our help and support in any way we can.

For further information call 020 7224 0999 or visit [www.endocare.co.uk](http://www.endocare.co.uk).
