

CLINICAL STUDY

A recently published 10-year clinical study from The Dental Advisor gives RelyX Unicem self-adhesive resin cement five stars and a 98 per cent clinical rating.

Through scientific evaluation protocol, over 1,300 anterior and posterior restorations were examined over six-months for post-operative sensitivity, marginal discolouration and retention.

RelyX Unicem self-adhesive resin cement performed well under all criteria, leading The Dental Advisor to conclude that "RelyX Unicem has proven to be a reliable self-adhesive resin cement over the 10-year recall period."

MOISTURE FRIENDLY

Fuji Ortho LC is a light-cured, resin reinforced glass ionomer for bracket bonding. It delivers benefits that composites cannot. It is moisture friendly so it bonds perfectly in a wet field. It can be used with either a non-etch or etch technique and no separate bonding agent is needed. Because it is less technique sensitive dentists can dramatically reduce chairside time.

Advanced glass ionomer technology bonds brackets with strength for even aggressive treatment and clean-up is fast.

After clinical trials brackets were debonded without decalcification. Fuji Ortho LC releases significant levels of fluoride to help prevent decalcification and decay.

HANDPIECE TECHNOLOGY

General Medical has the complete range of Mectron Prophy Units including the Mectron Multipiezo Touch.

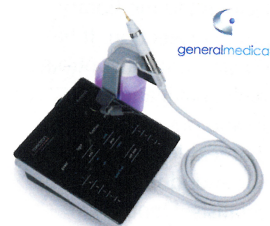

Designed to treat a range of oral problems, it enables the operator to perform procedures as subgingival debridement and adjunctive medicinal pocket rinsing, retrograde root treatment, implant maintenance.

Incorporating a slimline LED handpiece with innovative swivel-type focus for illumination, Multipiezo Touch is compact, powerful and incorporates technology and ergonomic design.

Multipiezo Touch's touch-screen controls enable

the operator to select the appropriate function (endo, perio or scaler), power, irrigation flow rate and LED light function. It is compatible with over 40 Mectron Inserts.

EDUCATION COMMITMENT

Helping dentists keep up to date with the clinical techniques is part of Henry Schein Dental's commitment to education. The 'Innovations in Dentistry' Symposium, on July 3-4 2014, will feature high-profile speakers.

Thursday July 3 – Altitude 360 (London) led by Professor Gianluca Gambarini, the day will help delegates gain knowledge on

the materials, equipment and techniques used within everyday practice.

Friday July 4 – Henry Schein Educational Centre (London) led by Professor Robbie McConnell, the day aims to help delegates appreciate the practical aspects of how materials and equipment have evolved, and to apply the techniques learned in practice. **For more information call 0845 873 6299 or email sales@conferenceshop.com**
