

Product News

Information on pharmaceuticals highlighted on these pages is brief, and must not be used for prescribing purposes. For full prescribing information, please refer to the summary of product characteristics for the relevant product on the electronic Medicines Compendium (eMC) website at: www.medicines.org.uk/emc.aspx

Tandex

New from Tandex, Prevent Wash and Prevent Fresh mouthwashes provide the optimal addition to a healthy oral care routine. Using a unique formula developed especially by the Danish oral health experts, Prevent Wash contains both fluoride and chlorhexidine making it double active and doubly effective. The fluoride in Prevent Wash strengthens enamel, and includes a strong antibacterial action, whilst the chlorhexidine offers ideal protection against plaque, caries and periodontal disease. Your patients will love the pleasant and refreshing peppermint flavour, with the added assurance that the mouthwash is completely alcohol free. Also available from Tandex is new Prevent Fresh—the same effective formula, but with added zinc—helping to prevent bad breath and making it triple active and triply effective! For more information on Tandex's full range of products, visit www.tandex.dk.

PerioChip

PerioChip® is an adjunctive periodontal treatment for pockets of 5mm and more, indicated for use in combination with scaling and root planing. Each chip contains 36% chlorhexidine digluconate and has proven to be clinically effective at eliminating 99% of subgingival periopathogenic bacteria. Dr Amit Patel, periodontal specialist and implant dentist at Birmingham Dental Specialists, says: 'PerioChip is my number one adjunct of choice for periodontal treatment. There are alternative products available, but for me this is an adjunct that seems to be truly effective.' Dr. Patel uses PerioChip® in the treatment of peri-implantitis patients as well, as there is good evidence that shows PerioChip® has a role in treatment of the disease. For more information or to contact the team behind PerioChip®, email team@periochip.co.uk or call 0800 013 2333.

EndoCare

EndoCare

At EndoCare we bring together a talented group of endodontists who are ready and available to assist you and your patients with all aspects of this challenging procedure. Our light and airy practices are located across London, and are equipped with the latest technology to ensure your patients receive the highest standard of care. From the moment your patient arrives there will always be a member of our warm and friendly team, who will be able to answer questions and alleviate any concerns your patient may have. For your complete peace of mind we will always communicate with you at each stage of your patient's time with us, and will return them to you pain-free, confident and happy with the quality of treatment they have received. For further information

please call EndoCare on 020 7224 0999 or visit www.endocare.co.uk.

Sparkle Dental Labs

Sparkle Dental Labs work with customers to create outstanding dental products that have been skilfully crafted in Britain by expert technicians. Sparkle Dental Labs use the highest quality materials to manufacture safe and reliable dental products that are fully compliant with GDC regulations. Dr Santosh Patil, Dental Surgeon at Straight Road Dental Practice in Lexden, said: 'Sparkle Dental Laboratory deliver excellent quality work, their service is quick and reliable. Onlays, crowns, bridges and dentures not only look great but fit perfect too. I would highly recommend my fellow colleagues to use their service.' With a fast turnaround policy, customers receive their exemplary products promptly from Sparkle Dental Labs and can take advantage of full traceability for every item. For any additional information please call 0800 138 6255, email customerservice@sparkledentallabs.com or visit www.sparkledentallabs.com.

Clark Dental

Clark Dental offers a range of outstanding digital imaging solutions designed to keep you at the forefront of dental technology. This includes Schick 33 – the latest addition to the Schick Digital Imaging System. Featuring the industry's highest image resolution and lowest learning curve, Schick 33 includes powerful DICOM digital radiography software, to give you a level of diagnostic control unlike ever before. With Schick 33 you really can see digital images your way. With a special clinical-specific mapping feature you can quickly and simply change between presets for general dentistry, endodontics, periodontics or restorative dentistry. You can also save personalised presets for yourself and for your colleagues, which makes the system ideal for multi-clinician practices. For more information call Clark Dental on 01268 733 146, email info@clarkdental.co.uk or visit www.clarkdental.co.uk.
