Colgate

www.colgateprofessional.co.uk

Colgate Professional partner in oral health, invites dental professionals to view a special learning broadcast delivered by professor David Bartlett, head of prosthodontics at King's College London Dental Institute. In this broadcast, dental professionals have the opportunity to learn how they can help patients with dentine hypersensitivity. Simply view, feedback and complete CPD questions to gain one hour verifiable CPD.

Dentine hypersensitivity is a painful yet common oral health problem. Although prevalence can be as high as 57%, some patients are reluctant to report sensitivity, which can make it difficult to diagnose and challenging to treat. Subsequently, toothbrushing and flossing become painful, putting patients at an increased caries risk.

Dental professionals can help them manage this condition. To view this complimentary broadcast please visit <http://www.colgateprofessional.co.uk/professionaleducation/DHS-in-the-dental-surgery-1-hour-verifiable-CPD/video>. References are available.

Endodontics Masterclass

0800 371652

www.fmc.co.uk

Endodontics MASTERCLASS

Endodontics Masterclass takes place 4 July 2014 at America Square. Endodontics Masterclass combines expert guidance through lectures and a three hour hands-on workshop to ensure all attendees walk away with the confidence, knowledge and technique to kick start their endodontic division.

Chaired by Dr Julian Webber, editor-in-chief of *Endodontic Practice*, the event boasts an international speaker line up including Ghassen Yared, Arnaldo Castellucci and more.

Every speaker will present a 90-minute lecture and an intense three-hour hands-on from 5-8pm to a small group of professionals. Endodontics is a good place to start for those who want to expand the practice's treatment portfolio.

GC UK

01908 218 999

Learn how to create beautiful composite restorations in the historic city of Leuven, Belgium with GC.

GC G-aenial is a special light cured composite that allows dentists to fabricate natural looking, aesthetic direct restorations. The hands-on G-aenial course shows how to craft functional composite restorations. Even monochromatic restorations become beautiful due to the special chameleon effect of GC G-aenial.

This special light curable micro-ceramic composite material benefits from important properties such as strength and durability. GC G-aenial has been developed to look like natural tooth structure.

G-aenial's more natural appearance has been achieved by creating a final restoration of optimum hue, chroma and brightness, while minimising the paleness inherent with composites. The result is a restoration with opalescence comparable to porcelains and close to natural teeth.

The GC G-aenial course includes flights from London Heathrow or Eurostar, transfers to the hotel and training centre, one night hotel accommodation, all meals together with all materials, models and equipment. It provides 10 hours of CPD accreditation.

Henry Schein Dental

029 2044 2818

suzanne.orourke@henryschein.co.uk

www.henryschein.co.uk

To help the dental team keep up-to-date Henry Schein Dental has announced its new and extensive education and development programme.

Courses include:
Infection control: a must for the dental team this course is designed to meet HTM Q1-05 and CQC audit requirements and provides a clear understanding of why the implementation of effective cross-infection control procedures are so important. Laser technology: four intensive courses for differing levels of experience, introduction to lasers in dentistry, diode laser in dentistry, periodontal laser surgery and lasers and Cerec.

Whitening: four evening courses covering a spectrum of topics, complex bleaching cases, getting patients to say yes to bleaching, seven habits of highly effective whitening practice and implement a team approach to bleaching. Courses run throughout the year nationwide at different locations and offer exceptional value for money and the opportunity to gain verifiable CPD. Other courses on hot topics are added at any time so for the latest schedule and details call Sue O'Rourke on the number above.

HENRY SCHEIN®
DENTAL | EDUCATION & DEVELOPMENT

Sirona Dental Systems

0845 071 5040

Sirona Dental Systems achieves a high level of training for Cerec users of all levels, including those experienced Cerec users and those dentists who have just taken delivery of their Cerec for the first time.

Sirona's training is designed to ensure new users quickly gain confidence while those more experienced users look to carry out more complicated cases.

To find out and understand the Cerec CAD/CAM technology contact a member of the Sirona team and book a place on the next available date to sample just how easy Cerec really is to use.

Cerec courses take place at Sirona's Centre of Excellence close to Heathrow airport with excellent road and rail links. Numbers on these CPD accredited courses are restricted so please book early to avoid disappointment. To reserve a place or for further information please contact Sirona UK directly.

The Dental Company

World Aesthetic Congress (WAC)

0800 371652

The World Aesthetic Congress returns to London on 12-13 September this year.

One of the UK's largest congresses for dental professionals will take over Twickenham Stadium for a lecture and hands-on symposium.

Boasting a star-studded speaker line-up and a variety of hands-on workshops, WAC promises to have plenty in store. Expect more interaction, more excitement and more hands-on workshops and prepare for a dynamic learning experience this September.

Scrub up on current dental knowledge and be inspired by world-class speakers. Whether it's botox with Bob Khanna, restoratives with Harris Sidelsky, resin realities with Jason Smithson or endodontics with Mohit Dabb, there is plenty to get stuck in to. Other headline speakers for the event include Andrea Ricci, Chris Barrow and Philip Friel.

MARKETPLACE: ENDODONTICS

Coltene Whaledent

01444 235486

www.coltene.com

To enhance the already wide endodontic range Coltene has launched the new endo cleaning pack.

This pack contains the products needed for irrigation and drying of the root canal during endodontic treatment.

Included are Surgitip-endo aspirator tips for effective canal accessibility and aspiration, Canalpro Naocl 3% for irrigation and debridement, Roeko canal brush to remove loosened tooth matter, paper points and cotton pellets, canalpro slotted end tips and colour-coded syringes for fast and easy delivery of solutions. The total saving of buying the endodontic cleaning pack is over 50%.

COLTENE

Dental Sky

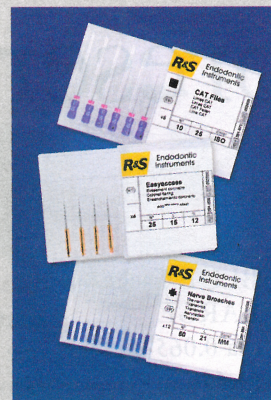

0800 294 4700

The R&S range of endodontic instruments is one of the market leaders in Europe. Also with Dental Sky the 'exclusive' UK distributor the range is sure to be a success in this country.

Being high quality, R&S endodontic instruments bring reliability to all endodontic work. The useful R&S Endoaccess nickel-titanium instruments provide easy access by widening the coronal third. With a non-cutting tip to avoid damage to the canal R&S Endoaccess nickel-titanium instruments help to simplify the introduction of endodontic instruments.

R&S Cat Files have been shown to be stronger and more flexible than regular K files due to the square cross-section of the instrument. These stainless steel files reliably move smoothly through the canal establishing a glide path in the canal for successive shaping. When it comes to curved canals, Cat Files will effortlessly flex, bending to the shape of the canal without breaking or causing excessive strain upon the instrument.

The 21mm R&S Nerve Broaches are available in a range of sizes from 15-60 in pack of 12 instruments; all colour co-ordinated to allow for easy identification.

Endocare

020 7224 0999

www.endocare.co.uk

EndoCare

Endocare brings together a talented group of endodontists who are ready and available to assist dentists and their patients with all aspects of this challenging procedure.

Endocare's light and airy practices are located across London and are equipped with the latest technology to ensure patients receive the highest standard of care. From the moment the patient arrives there will always be a member of Endocare's friendly team who will be able to answer questions and alleviate any concerns the patient may have. For referring dentists' peace of mind, Endocare will always communicate with the dentist at each stage of their patient's time with the clinic. Endocare will return the patient to their dentist pain-free, confident and happy with the quality of treatment they have received.
