

Actions speak louder than words

EndoCare understand that it's not what it says that matters; it's what the company does. As one of the UK's leading endodontic referral centres, EndoCare is extremely proud of its caring and empathetic manner and always puts your patients first.

Its calm, thoughtful and straightforward approach instantly puts your patients at ease, so when you need high-quality trusted endodontic specialists, look no further.

The company understands the importance of clear and thorough communication throughout the referral process, and its skilled and passionate team of experienced professionals works together to become an integral part of your practice.

Contact EndoCare today to see how your practice and patients can benefit from working with a leading endodontic referral centre. It's not what EndoCare says that counts; it's what it does. ■

New software update

VERSION 5.2 of Sirona Dental Systems' SIROEndo software is the passport to more effective and convenient root-canal treatment. As soon as the dentist reaches the apex he can reverse the rotation of the file – either on the SIROEndo unit or via the foot control. Just one brief touch is enough to change from clockwise to counterclockwise rotation and vice versa.

Introduced six months ago, the new apex indicator keeps the user informed at all times. The exponential progress bar now consists of eighteen blocks as opposed to six. It indicates the distance between the file tip and the apex. When the file tip reaches the apex an 'A' is displayed. The message '-1' is shown as soon as the tip extends beyond the apex. This is accompanied by differentiated acoustic signals. A series of short beeps can be heard as the file approaches the apex. This changes to a continuous tone when the file tip goes beyond the apex.

"Since the launch of SIROEndo at IDS 2005 we have continuously developed the software," says Anja Weidemann, product manager in the Instruments Division of Sirona Dental Systems. ■
