

The ins and outs of incorporation

INCORPORATING your dental practice can provide a number of benefits and protections for you as a practice owner, but the process can be complicated if you are unsure of the precise legal elements involved.

Goodman Grant Solicitors has the experience necessary to help explain and guide you through the process from start to finish – and with their in-depth knowledge of the dental sector, the team can tailor their service to meet your specific needs.

With an expert team of legal advisers in offices across the country, Goodman Grant can offer you appropriate and specialist information to ensure you achieve the best possible outcome.

If you are looking for advice about incorporation, or a variety of other legal matters, be sure to contact Goodman Grant Solicitors today. ■

A toothbrush for all nations

Humble Brush

YOUR choice of toothbrush can have a positive impact on the environment and vulnerable people needing dental care across the globe.

Humble Brush is brand new to the UK and Ireland, and its creators, the Humble Smile Foundation (www.humblesmile.org), hold conservation and humanity close to their hearts. Poor oral health is pandemic in far reaches of the world, where children lack the means to care for their oral health, very few dental clinics, no toothbrushes and no fluoride. The Humble Brush is an environmentally sustainable toothbrush: the handle is made from bamboo – which is 100 per cent biodegradable and grown in a way that doesn't affect the pandas – and all packaging is made from recycled materials.

Aiding the oral health of children worldwide, every Humble Brush sold in the UK generates an equivalent donation to communities in need. Contact the team at Humble Brush today. ■

Excellent advice from the experts

WHEN Peter Instone and his colleagues were ready to sell their practice, they chose to work with Dental Elite.

"We were happy with them in every way," he says. "They were excellent; we had no problems.

"Being able to talk to the same person throughout the process was useful – they knew everything that was going on from start to finish. Any questions we raised, they were able to get back to us with answers.

"I would certainly recommend Dental Elite to others."

With a team that is proud to have over a hundred years' experience in the dental sector, Dental Elite is in the perfect

position to assist professionals through the sale of their practice. The company has a reputation for offering practical and pragmatic advice and approach each case with honesty and openness.

If you are looking to sell your dental practice and want guidance from the experts, look no further than Dental Elite – contact the team today. ■

An answer to a growing perio and peri-implant problem

A SIGNIFICANT and growing number of patients over 40 have some degree of periodontal disease and the increase in popularity of dental implants means that there are potentially more peri-implant disease cases that will require early intervention.

Chlo-Site gel is proven to inhibit the growth of oral pathogens responsible for periodontitis and peri-implant mucositis. It is easy to apply and allows natural healing and regenerative processes to take place.

Chlo-Site gel is an inexpensive treatment that's simple to use and well tolerated by patients. The problems of antibiotic resistance are avoided and there are

reports of reductions in pocket depth after only one or two treatments.

First order comes with a free sample 0.25ml Chlo-Site syringe for you to trial (subject to availability). To place an order, contact Swallow Dental Supplies Ltd. ■

Inspirational training courses

DR NICK Harrison from Ponthir Dental Practice of the Restore Dental Group, has been providing the Inman Aligner to patients for the last couple of years.

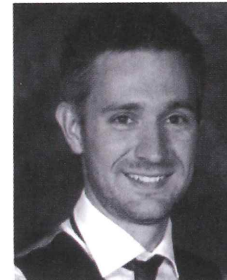

He said: "I had seen the appliance marketed in the professional media and decided to take the hands-on course in order to offer a new option to patients and compliment my professional development.

"The course itself was excellent – very inspirational. The instructors, Tif Qureshi, James Russell and Tim Bradstock-Smith were all very knowledgeable and passionate about what they were doing. They were also really personable, so despite there being many people in attendance, they made an effort to speak to everyone on the course.

"Overall patient compliance has been good with the Inman Aligner and cases have progressed quickly with great results. I have already recommended the training course to colleagues and would definitely recommend it to others."

For more information on IAS Academy, providers of genuine anterior alignment orthodontic devices, contact IAS today. ■

Christmas is coming

IT'S FAST approaching, that time again and Kemdent are delighted to announce their popular Christmas Hamper Promotion for 2015.

To qualify for a free Christmas Hamper, Kemdent customers need to spend £265 or more during November; a task that should present few problems given the wide range of offers on dental surgery products currently available.

On the run up to Christmas, customers can buy more and save more on Diamond Rapid Set Capsules. The user friendly, pre-dosed glass polyphosphonate restorative material is a real alternative to posterior composites and amalgam. Packed in individual, easy to access foils, it is extremely tough, durable and resistant to edge chipping. After six months it develops a compressive strength of 350MPa and can be used to perform non-load bearing class I and II restorations, together with deciduous teeth, the sandwich technique and core build-ups.

With three sizes of Christmas hamper available, the more you spend in November on Kemdent products, will ensure a larger Christmas hamper.

Get in touch with Kemdent today. ■
