

ALCOHOL FREE

During November 2015 get 50 per cent discount when buying 1 x 5L ChairSafe alcohol free disinfectant and 1 x 250 ChairSafe alcohol free heavy duty surface disinfectant wipes. Offer price £32.74 + VAT.

ChairSafe disinfectant is alcohol free; it is specially formulated to clean sensitive surfaces and equipment, including the leather and synthetic facings of dental chairs. But it is also suitable for frequently touched surfaces e.g. door handles and work surfaces.

ChairSafe is effective against HBV/HIV/HCV/BVDV/vaccinia, bactericidal and fungicidal microorganisms within one

minute of application. Kemdent ChairSafe disinfectant, if used correctly, will inactivate influenza A (H1N1) - viruses (pathogens of swine flu).

CAREER DEVELOPMENT

Rodericks is dedicated to ensuring working conditions and career development opportunities for its staff; CPD courses are available for the whole team and external training is facilitated where appropriate to enable further development of skills and careers.

Access to an established support network provides benefits such as clinical advice, experience and fresh ideas.

Christian Guenin, associate at Westminster

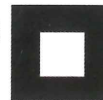

House Dental Practice,

commented:

“The fact that it is run in an efficient corporate manner by practicing dentists is obvious from the outset and sets us apart from the rest. I am impressed by the strong core emphasis on patient care and excellent quality dentistry.”

BURSARY AWARDS

With the application deadline looming, now is the time for anyone wishing to submit an entry to the Association of Dental Groups' (ADG) Bursary Awards 2016 to do so.

Closing December 31, 2015, any undergraduate dentist, hygienist, therapist or clinical dental technician is eligible to apply for either the professionalism or skill mix in dentistry undergraduate award.

A bursary is also available to any postgraduate student or dentist with a dental degree undertaking postgraduate training. The application must cover either how to improve access for disadvantaged people

or raising awareness of oral cancers.

Gold, silver and bronze undergraduate bursary prizes of £1,000, £750 and £250 are available, plus a £5,000 prize for the postgraduate winning entry.

HOMOGENOUS SERVICE

EndoCare strives to be more than just a referral clinic – it aims to be a part of the practice team.

Referring practices are kept up to date with every facet of a patient's treatment, so they can be assured of the quality of treatment that is being received. Whether by email or over the phone, the referrer is always kept involved.

This creates a homogenous service that saves time and means patient are never left in doubt that they are receiving the

appropriate care.

Endocare has three state of the art facilities, an experienced team and the ability to manage complicated endodontic treatments.

CONVENIENT RCT

Version 5.2 of Sirona Dental Systems' SiroEndo software is a passport to more effective and convenient root canal treatment.

Introduced six months ago, the new apex indicator keeps the user informed at all times. The exponential progress bar now consists of eighteen blocks. It indicates the distance between the file tip and the apex,

displaying an "A" when the file tip reaches the apex. The message "-1" is shown as soon as the tip

extends beyond the apex. This is accompanied by differentiated acoustic signals. A series of short beeps can be heard as the file approaches the apex; this changes to a continuous tone when the file tip goes beyond the apex.

FORWARD THINKING

More and more patients are choosing implants, and the forward thinking laboratory must be ready to meet these demands.

By forming a lab-to-lab partnership with Sparkle Dental Labs and fulfilling referral based implant dentistry, there is potential for laboratories to grow. With some of the best facilities and technology in the UK and quality materials, Sparkle Dental Labs helps labs compete with larger operations to offer comprehensive services.

Sparkle Dental Labs is able to provide a wide range of bespoke products, all manufactured in accordance with MDD and is registered with the MHRA and the Dental Appliances Manufacturer Audit Scheme (DAMAS).
