

MANAGEMENT APPRENTICESHIP

Build on existing skills by gaining all the business knowledge and practical experience needed to manage a dental practice with the Trailblazer Management Apprenticeship.

Plus, earn a nationally recognised Level 4 qualification with the ILM Certificate in Leadership and Management.

With only three to four classroom based days, held at Barnet and Southgate College in London, honing these skills requires next to no time away from the practice.

The two year programme covers human resources, patient care, clinical, marketing,

risk management, quality assurance, finance and the dental industry.

The next starting dates are March 18, May 13 and July 1.

For more information call 0208 266 4333 or email apprentice@barnetsouthgate.ac.uk

GREAT INVESTMENT. GREAT OPPORTUNITIES. GREAT PROSPECTS.

NEW LAUNCH

Unigloves has just launched its latest range of gloves – Vitality – including Vitality Nitrile – white, powder free with Lano-E coating; Vitality Latex – white, powder-free with Lano-E coating; and Vitality Latex scented – green, powder free with Lano-E coating and scented with a pleasant citrus and peppermint flavour.

The lanolin and vitamin E (Lano-E) coating is designed to reduce skin irritation and dehydration. This is supported by the multiple wash cycle which makes the gloves cleaner and safer by reducing residual water soluble proteins and other harmful chemicals, thereby

minimising allergy risks.

The double chlorinated beaded cuffs facilitate easy donning and removal of gloves whilst the micro-roughened texture ensures optimal grip.

PERSONAL EXPERIENCE

Isabel Burgess, dental nurse at Rocky Lane Dental Practice in Heswall, comments on her Waterpik Water Flosser: "I have a wisdom tooth with a large food trap that is really difficult to clean effectively, but since starting using the Waterpik Cordless Plus Water Flosser, it hasn't been infected."

"I normally recommend this model as it is the one I have had much success with. I found the Water Flosser to be better than interdental brushes for my infected wisdom tooth, and

more effective than brushing alone or also using interdental brushes with my fixed orthodontic appliance."

MORE THAN REFERRALS

EndoCare strives to be more than just a referral clinic – it aims to be an integral part of the dental team.

Endocare keeps referring dentists up to date with every facet of a patient's care, so they can be assured of the quality of treatment received. This way, a more homogenous service is created that not only saves time, but means the patient is never left in doubt about the care they are receiving.

With three state of the art facilities, an experienced

and compassionate team and the expertise to manage complicated endodontic treatments, EndoCare can be the solution to a practice's referral needs.

For more information call 020 7224 0999 or visit www.endocare.co.uk

PREVENTING TOOTH LOSS

With the help of PerioChip, periodontal disease can be stopped in its tracks.

After root surface debridement (RSD), PerioChip can kill off putative periodontal pathogens and prevent them from re-establishing.

PerioChip is a biodegradable, non-antibiotic insert containing chlorhexidine digluconate designed for periodontal pockets over 5mm deep.

PerioChip uses a controlled release system to target the site with the active ingredient and eliminate 99 per cent of perio-pathogenic bacteria over the first seven days and carries on suppressing the growth of

bacterial flora for up to 11 weeks.

Placed directly into periodontal pockets over 5mm, clinical studies showed a pocket reduction of more than 2mm in almost three quarters of patients when PerioChip was placed every three months, in combination with RSD.

For more information call 0800 013 2333 or email team@periochip.co.uk
