

Does what it says...

FREE major exhibition, international speakers, product launches, free team CPD, hands-on workshops, Dental Awards – delivering a diverse range of first-class learning, networking and socialising opportunities, The Dentistry Show does exactly what it says on the tin.

Catering to the educational needs of every member of the dental team, the 2016 event is set to surpass all previous successes.

New world-class speakers will present the dynamic two-day lecture programme; new topics relevant in today's dentistry will be explored; and new top dental manufacturers and suppliers will boost the already 400-strong trade floor. Popular features from last year will also return, including the hands-on workshops, additional theatres, hours of CPD and the prestigious Dental Awards.

With something for everyone, this really is an event you and your entire team cannot afford to miss.

Know your contracts well

THE CONTRACTS dental professionals must sign, whether GDS or PDS, are lengthy and convoluted documents.

Nevertheless, it is imperative that those signing them understand exactly the terms and conditions included within.

But dental professionals are not necessarily legal experts – and why should they be?

That's why it is so important to seek out professional legal advice when considering new contracts – like that provided by Goodman Grant Solicitors.

With a dedicated and highly experienced team of experts, Goodman Grant understands the precise nature of dental contracts and can help you ensure everything is completed and correct before you sign.

The team can offer you up-to-date support, making sure you understand what is required of you through the contract and what you are entitled to in turn. This undoubtedly helps safeguard you and your practice in the future and certainly provides peace of mind.

If you have been worrying about your contract, contact the team at Goodman Grant Solicitors. ■

More than just a referral clinic

ENDOCARE strives to be more than just the clinic you send your patients to for the treatments you can't provide – it aims to be an integral part of your team.

EndoCare ensures that you are kept up-to-date with every facet of your patient's time with the clinic, so you can be assured of the quality of treatment they are receiving. Whether by email or over the phone, the clinic aims to always keep you involved.

This way, EndoCare creates a more homogenous service that not only saves you and the clinic time, but means the patient is never left in doubt that they are receiving the best care.

With three state-of-the-art facilities, an experienced and compassionate team

and the expertise to manage even the most complicated endodontic treatments, EndoCare can be the solution to your referral needs.

To find out more about how you can work together, contact the team today. ■

Advanced apprenticeship in dental nursing

DENTAL nurses play an integral role in the successful running of a modern dental practice. That's why the new Advanced Apprenticeship in Dental Nursing is such an exciting opportunity for the development of practical skills, experience and knowledge.

The blended learning programme combines hands-on instruction in the practice with interactive teaching via live webinars. It covers everything from health and safety to chairside support,

Apprenticeships

Barnet Southgate
healthcare learning

patient education, treatment planning and management of oral diseases, resulting in a Level 3 Diploma in Dental Nursing and the chance to register with the GDC.

With only a few days of classroom workshops, apprentices remain in the practice for the vast majority of the course, enabling employers to mould new talent in line with the business' ethos and values.

Delivered by Barnet and Southgate College, London in association with Healthcare Learning, the Advanced Apprenticeship in Dental Nursing is the perfect tool to help build long-term professional careers. ■

Secure referral is within your grasp

AS A professional with an ingrained sense of pride in your work, referring patients for specialist care can be a daunting task. You require as much professionalism and consideration towards those who have entrusted you with their health as you yourself have offered. The London Smile Clinic will deliver on all counts.

The team is delighted to have expanded their remit into the endodontic arena alongside Dr Daniel Flynn, a gold-standard specialist with an impressive pedigree. Currently splitting his time between the London Smile Clinic and lecturing at the largest postgraduate dental school in Europe, Dr Flynn is well placed to tackle the most challenging dental treatments in

his chosen field.

The London Smile Clinic offers the latest technology, ensuring the gentlest, pain-free dental treatments within the profession, constituting impeccable service. In partnership with you, the team continues to offer a supreme standard of care to your patients, returning them to your practice for exemplary on-going treatment.

Perform restorations accurately and quickly

DURING February 2016, buy one Diamond Carve Glass Ionomer Selection Kit at only £150 + VAT. The Diamond Carve Selection Kit consists of 5 x 10g powder/1 x 25ml liquid with seven shades to choose from.

Diamond Carve is designed for Class I and Class II restorations together with class V abrasion cavities. It can be used for restorations in deciduous teeth, core build up and amalgam repair. Diamond Carve has a working time of 2 - 2.5 minutes and a setting time of 3.40 minutes. Over time, it develops a compressive strength of 350MPa, which is far higher than any other comparable

material. It also has a high resistance to edge chipping.

It has a packable consistency, which is chemically cured and a rapid chemical snap-set. The restoration is saliva resistant once the chemical snap set is complete. Also, there is no need to worry about dimensional change or post-operative sensitivity when you use Diamond Carve. The consistency of the mix, its durability and flexibility will help a dentist perform restorations accurately and quickly. ■

The gold standard

LEADING the way in dental innovation, Nobel Biocare has remained 'first for 50 years'.

Its wide range of solutions enables clinicians to deliver advanced treatments with accuracy and predictability,

enhancing aesthetics and longevity of outcomes.

The NobelProcera 2G system uses cutting-edge technologies to produce images of outstanding quality, all the while streamlining the workflow and improving communication with other members of the dental team. Additional products, such as those in the complete posterior solution, then offer exceptional placement and restorative possibilities.

Using complete Nobel Biocare systems, alongside the world-class training and education available, you can really push the boundaries of what is possible.

Dr Andrew Dawood said: "Nobel Biocare, as the original innovator in digital dentistry for the planning and manufacture of CAD/CAM products, helps us to bring the treatment of these cases within the realms of possibility. Nobel Biocare has consistently set the gold standard for education in implant dentistry with innovative programmes that have changed the way that implant dentistry is communicated."

Precise and perfect pace

DR SOHAIR Hayat from Cricklewood Dental Practice in London took the hands-on training course for the Inman Aligner last summer.

"The content and format of the course was very precise and delivered at a perfect pace, from instructors of a superior quality. The speakers covered the basic principles first and then slowly went into the depths of orthodontics to enable me to build and maintain a sound knowledge base.

"I enjoyed the hands-on element of the course particularly. It made me feel confident that the skills I had learned on the course could be applied to real life easily. The practical demonstrators were available to each and every candidate to check the IPR, rests and even prescriptions, giving insight into their personal experience as well as the reassurance that the technique is easy and applicable.

Since completing the course, I have started looking at patient's occlusion in a different light and also have started treating patients with anterior crowding. The best thing is that the Inman Aligner produces results in just six to 16 weeks." ■
