

Excavating caries: check-ups are good, SIROInspect is better

In May Sirona, technology leader in the dental industry, is bringing a detection system onto the market that enables dentists to identify reliably, quickly and simply where caries does or does not exist: SIROInspect.

SIROInspect is based on Fluorescence-Aided Caries Excavation technology, known as FACE®, which exploits the fluorescence characteristics of teeth. If teeth are illuminated with violet light in the spectrum of around 405 nm, it doesn't only stimulate degradation products of caries bacteria but also healthy dentine to fluoresce. Healthy dental tissue lights up green whereas carious areas are visibly red. The attending dentist can therefore see at first glance – and very clearly – which areas are carious and which ones are not.

The Dentistry Show 2015 to host The Dental Awards

The Dentistry Show is delighted to announce that the prestigious Dental Awards 2015 will be held as part of next year's event.

Recognising and celebrating the achievements of individuals and groups throughout the UK, the coveted Awards will offer yet another highlight to what has become known as the dental show of the year.

Chris Brown, Event Director of The Dentistry Show, is delighted to be working with Purple Media Solutions to bring the UK's premier annual awards scheme to the next event:

"The Awards will provide a fantastic new opportunity for delegates at the Show to get involved with the profession, while celebrating their many triumphs in the last year. Once again ensuring The Dentistry Show is at the very forefront of the modern industry, The Dental Awards 2015 will offer an even more varied and exciting social and networking programme.

"We are thrilled to be supporting the dental profession in this way, and we look forward to hosting such a highly distinguished and respected event."

For information on entering the 2015 Dental Awards please contact linda.aiken@purplems.com.

Protect Your Patients with Bib-Eze

Bib-Eze™ dental bib holders from DUX Dental have been created specifically to optimize hygiene in the dental surgery.

Researchers at Tufts University School of Dental Medicine recently proved dental bib clips to be a common source of bacteria in the practice. In fact, they found that 40% of bib clips tested post-disinfection retained one or more aerobic bacteria, and 70% retained one or more anaerobic bacteria.

DUX Dental designed disposable Bib-Eze bib holders to eliminate the problem, and to ensure the safety of both you and your patients.

Made from lightweight, elasticised fibre, Bib-Eze guarantees patient comfort, while also offering easy handling and application for a smooth and efficient workflow. Just peel, stretch to fit and stick the adhesive edge to any bib, and your patients are protected from any potential contamination.

For a convenient and cost-effective way of keeping your patients safe, get your free trial Bib-Eze disposable bib holders from DUX Dental today.

For more information or for your free trial pack please call 00800 24146121 or email info@dux-dental.com

Difficult diagnosis? Refer to EndoCare

At EndoCare we excel at diagnosing and treating dental pain in all its forms. Our team of highly trained Endodontists are all experts in their field and absolutely committed to relieving pain and saving teeth. In fact in the last 10 years, we've saved over 10,000 teeth from extraction!

Our philosophy is simple: we aim to provide high quality Endodontic treatments in a warm and caring environment where patients' needs are always our number one concern.

So if you have a difficult diagnosis, or need help with any aspect of root canal treatment, give our expert team a call today. We welcome contact from all referring practices and are ready and willing to assist you in any way we can. We particularly excel at treating nervous or anxious patients and other challenging issues such as hot pulp, microsurgery and re-treatments.

To find out more, contact EndoCare today.

For further information please call EndoCare on 020 7224 0999 Or visit www.endocare.co.uk

GC introduce the next generation of flowables

GC Europe, the leader in dental materials technology is pleased to announce the launch of two superior flowable materials; G-aenial Universal Flo and G-aenial Flo, to give patients the best aesthetic, functional and durable restorations.

Both flowable materials benefit from a composition that features a unique filler technology. Unlike other flowable composites the GC materials have a higher filler load and a homogeneous dispersion of fillers.

G-aenial Universal Flo is radiopaque and features a high viscosity, making it ideal for placement in class I-V restorations. Essentially, it looks like a flowable but behaves like a restorative. Its indications are for direct restorations, minimum intervention cavities and fissure sealing.

These restoratives are dispensed through an ergonomically designed syringe that enables smooth delivery of the material, with a tapered tip that means no paste can stick to it. The syringe size provides a comfortable hold and the arched shape of the flange fits the hand ergonomically. The design also prevents material waste because minimal residual paste remains in the syringe after use.

For further information please contact GC UK on 01908 218 999.

Diamond Snappy – The key to a happy child in the dentist chair

Buy 1 pack of 10g/7ml Diamond Snappy Glass Ionomer Restorative Cement and get 1 free! This offer is available until 31st July 2014

The key for Dental Professionals treating children this year is to find that happy medium where the patient can be given valuable chair time without causing unnecessary delays in the waiting room.

Snappy restorative GIC from Kemdent can save significantly on treatment times, meaning the patient can enjoy shorter dental visits whilst retaining high quality dentistry.

Diamond Snappy GIC is easy to pack and place, genuinely releases fluoride, leaves no bitter after taste and sets in less than 3 minutes from a starting mix of 23 °C. It offers resistance to saliva as soon as the cavity is filled, targeting large cavities in deciduous teeth. It comes in a natural white shade with translucency continuing to improve with time.

To take advantage of this special offer or to place an order call Helen on 01793 770256 or visit our website www.kemdent.co.uk.

Finding your way around a GDS contract

The team at Goodman Grant Solicitors have 75 years' experience in dealing with the regulatory bodies that govern the dental industry. As such they are perfectly situated to provide advice and guidance in all areas

of dental contracts.

GDS contracts run to several hundred clauses over approximately 150 pages and have provision for any number of conditions, many of which may or may not be applicable in individual circumstances.

Specifically designed to accommodate dental partnerships, they cover the many scenarios that can result from such agreements. For instance clause 231 deals with how the composition of the contract can be changed without affecting its validity, and there are clauses that describe what must happen in the event of the death of a partner.

Without professional assistance, understanding your GDS contract can cause real confusion and uncertainty. Goodman Grant Solicitors specialise in dental contracts and are able to help explain the many intricacies of the GDS contract to ensure that appropriate decisions are made. Contact the experienced team today to ensure your contract is the right one.

For more information call Ray Goodman on 0151 707 0090 email rmg@goodmangrant.co.uk or John Grant on 0113 8343705 email jmg@goodmangrant.co.uk

Give your business the MyRay Boost

Visualisation solutions for all situations

Delegates at the BDA Conference and Exhibition 2014 were given the opportunity to test for themselves the Carl Zeiss visualisation systems provided exclusively in the UK by Nuview. They were particularly impressed by the incredible image quality and ergonomic sophistication on display.

With a selection of loupes and dental microscopes ranging from the fantastic TTL Teloupe and the GTX, to the top-of-the-range OPMI Pico dental microscope, the team from Nuview were happy to explain the many advantages of these fantastic dental tools.

Whether delegates were endodontic specialists looking for the perfect microscope to see deep down into the root of a problem, or GDPs looking for a set of loupes to accompany their everyday dentistry, Nuview exhibited an effective solution for every scenario.

Discover the benefits that employing a Carl Zeiss visualisation system can bring to your daily practise by contacting the team at Nuview today.

For more information please call Nuview on 01453 872266, email info@nuview-ltd.com or visit www.nuview.co

Roger Gullidge Design – your practice, from start to finish

Beth and Hamid Saljugh recently worked with Roger Gullidge Design, to create Your Dentist – a dental practice based in the heart of Bristol city centre. Beth Saljugh says: "As soon as we discovered Roger Gullidge Design, and met Director Roger Gullidge, we knew he was the right person to help us make our vision a reality.

"He was able to act as both architect and project manager, ensuring the whole process ran smoothly. Now the practice is complete we are both absolutely delighted with the result. Our ethos has always been one of care and commitment to patients, and we believe that this has been reflected in the final design.

"It was of huge benefit to have Roger Gullidge with us throughout the project, right from its conception to realisation. He made sure that the fundamental design was what we wanted, that it conformed to building regulations and planning permission, and ensured that all necessary work ran without a problem.

Roger Gullidge Design is a specialist design and project management consultancy specialising in the dental sector. Call 01278 784442 for more details or visit: www.rogergulligdesign.com

The concise dental range to make you smile

Graham Gardner Ltd has been producing healthcare garments for over 100 years covering an extensive area of professions. To make it simpler for Dental Surgeries to make the best selection to meet their requirements, Graham Gardner has now produced a more concise collection, highlighting key garments ideal for Dental staff. This comprises scrubwear from

Smitten, Urbane and Landau, plus stylish workwear from the Vitality range, and complementary footwear from Toffeln.

Working with Dental surgeries for decades has given Graham Gardner the experience they need to create this collection, cherry-picking the perfect garments for all practice staff. With a huge range of colours available, practice managers should readily be able to pick the best combination to reflect the practice identity.

Call Graham Gardner direct on 0116 255 6326.

Feel-good dentistry

The Patient Experience is really what matters; and what sets you apart from the rest. A well-designed and modern practice will help bring the feel-good factor to a trip to the dentist and enhance the Patient Experience. Your patients will know that they are investing their time and money wisely.

A treatment room that does not appear to have their optimum comfort and safety in mind will not make the best first – and lasting – impression. At Tavom UK we not only supply contemporary and bespoke dental cabinetry, but also a full on-site design and installation service, to refresh even the smallest dental surgeries for maximum functionality.

Tavom UK will project-manage the whole design process to ensure your new practice is as efficient, ergonomic and stylish as possible. Our highly experienced team will install your new products with minimal disruption to your working day, and provide on-going customer support once the new cabinets have been fitted.

The variety of our ranges will suit all budgets, with modern colours and finishes, and can be tailored to suit the preferences and the image of the practice you want to create.

To find out how to update your practice with contemporary dental cabinetry, go to www.tavomuk.com, call 0870 7521121 or email: info@tavom.co.uk
