

## STRENGTH IN CLUSTERS

Filtek Z500 universal composite is a visible light activated, direct restorative nanocomposite.

The material uses 3M ESPE's nanotechnology. If nanoparticles are formed into small, medium and large clusters, those clusters won't dislodge – so the material preserves its polish finish whilst retaining strength afforded by the presence of small, medium and large particles within its matrix.

Filtek Z500 universal composite is suitable for both direct and indirect anterior and posterior restorations including inlays,

onlays and veneers. It features reduced stickiness and is available in eight shades and one opaque shade.

3M ESPE and Filtek are trademarks of the 3M Company. **For more information, call 0845 602 5094 or visit [www.3Mespe.co.uk](http://www.3Mespe.co.uk)**

## CPD APP

Dental practitioners have the responsibility to keep skills and knowledge up to date. The Dental CPD Pro app is an easy way to get time back, by earning verifiable CPD whenever and wherever. Sharran Westmoreland, a dental nurse at Boothstown dental, Manchester, says, 'It's a good idea, a simple way to pump up your CPD hours. I have it on both my smartphone and tablet, so I can go back and complete my courses as and when.'

Places on courses soon get filled and once you have taken a day off and, in my case, travelled into the city,

it's hard."

## HANDS-ON TRAINING

Brian Franks provides training courses for a range of non-surgical facial aesthetic treatments. With a one to five instructor - delegate ratio.

Courses are available in Botulinum Toxin and dermal fillers at both foundation and advanced levels, allowing the development of skills after dentists mastered the basics.

Raheela Raza, from Kingsport Dental Clinic in Livingston, Scotland, attended the advanced training course in dermal fillers.

"It was an enjoyable and informative day," she says. "The small group size provided opportunity to watch

demonstrations and practise the skills myself. There was a lot of hands-on training which was great."

## DIAGNOSE AND TREAT

EndoCare diagnoses and treats dental pain in all its forms. The team of endodontists are committed to relieving pain and saving teeth. In fact in the last 10 years, they've saved over 10,000 teeth from extraction.

The philosophy is simple: to provide high quality endodontic treatments in a warm and caring environment where patients' needs are always the number one concern.

They welcome contact from referring practices and are ready and willing to assist in any way. They particularly excel at treating nervous or anxious patients and other

challenging issues such as hot pulp, microsurgery and re-treatments.

## RADIATION PROTECTION

Energy Simple provides radiation protection solutions and radiation protection services.

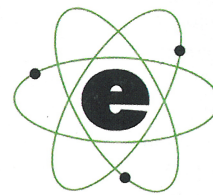

They will supply an expert radiation protection adviser (RPA) to companies for appointment, as required by the Ionising Radiation Regulations 1999, and will manage all administration.

A member of the team will visit premises and undertake an inspection to audit an organisation's compliance with all relevant regulations - a report will be provided on

completion.

Energy Simple provide certificated training for radiation protection supervisors and general radiation awareness training on site or at their training facilities.

**For more information call 0800 024 6661 email [info@energysimple.com](mailto:info@energysimple.com) or visit [www.energysimple.com](http://www.energysimple.com)**
