

### **Saving teeth and changing lives**

At EndoCare we understand the importance of delivering first class dentistry and the effect that a healthy mouth can have on a patient's overall health and well being.

The connections between systemic medical conditions such as heart disease and diabetes with oral health and periodontitis are well established and it is vital to address these issues with patients at every opportunity. Our experienced experts always look for ways of sharing their knowledge and skills with patients and the profession alike; by ensuring everyone is well informed and educated, we can begin to change lives.

At EndoCare we are committed to saving teeth and enhancing the lives of your patients. We believe in the benefits of endodontic therapy over extraction and are passionate to ensure your patients retain their natural teeth for life. When you refer to us, your patients are treated to a first class service and state-of-the-art facilities, which come with the promise that we'll do everything we can to save their teeth.

For more information on how your practice can benefit from our years of experience contact EndoCare today.
