

## FAIL-SAFE BONDING

R&S Ionoglass from Dental Sky is a proven glass ionomer luting cement. It has been specifically developed for the permanent cementation of inlays, crowns and bridges, as well as orthodontic bands.

Ionoglass has a low film thickness to ensure correct seating of the final prosthesis. The neutral colour ensures that there won't be any 'shine through' when used in the anterior region. With an on-going fluoride release, Ionoglass bonds chemically to the tooth structure ensuring a tight

marginal seal and excellent bonding properties.

## SAVING TEETH

The connections between systemic medical conditions, such as heart disease and diabetes, with oral health and periodontitis are well established and it is vital to address these issues with patients at every opportunity. Endocare's experienced experts always look for ways of sharing their knowledge and skills with patients and the profession alike; ensuring everyone is well informed and educated can change lives.

EndoCare is committed to saving teeth and enhancing the lives of patients. The Endocare team believe in the benefits of endodontic therapy over

extraction and are passionate about ensuring patients retain their natural teeth for life.

## PREVENT AND PROTECT

Adopting preventive measures in practice is essential in helping patients achieve optimum oral health. Fissure sealants can be particularly beneficial, especially in young children who require extra protection against caries.

Clinpro Fissure Sealant from 3M Espe can provide this protection while offering a convenient direct delivery syringe for simple application. The low viscosity allows it to flow easily into pits and fissures.

Clinpro Fissure sealant also utilises colour change technology to allow

for easy placement. Clinpro Fissure sealant is pink when applied and changes to an opaque white once exposed to light, leaving a layer of invisible protection.

**For more information call 0845 602 5094 or visit [www.3Mespe.co.uk](http://www.3Mespe.co.uk)**

## NEW AND IMPROVED

Seeking to bring innovation to the area of infection prevention, Dentisan has made some changes to Biocleanse Ultra Wipes to improve its use in surgery. The changes include a larger size wipe, a more durable material, increased ease in tearing along perforations, new ergonomically designed tub and a fresh new look.

Using a formulation based on alcohol free technology, Biocleanse Ultra Wipes are compatible with a range of surface materials, offer wide spectrum disinfection within a pH neutral formulation and require only a single stage process.

Biocleanse Ultra is compliant with HTM 01-05 regulations and is efficacious against mycobacteria, including TB and enveloped viruses such as Hepatitis B and C.

A special price offer is available until October 30, 2015.

## A NATURAL CHOICE

Visitors to GC UK's Facebook page can receive a free sample of MI Varnish and learn more about the product.

Remaining on the teeth longer and containing high levels of fluoride, phosphate and calcium, GC's MI Varnish with Recaldent (CPP-ACP) is suitable for patients at risk of hypersensitivity.

Recaldent is a special milk-derived protein that strengthens teeth by releasing calcium, phosphate and fluoride, thereby making MI Varnish a natural choice for patients.

MI Varnish has a smooth, creamy texture, exhibits no

colour change and is patient friendly with a choice of strawberry or mint flavours. The thin film thickness is comfortable to patients, even with multiple applications. **For more information call 01908 218999, e-mail [info@gcukltd.co.uk](mailto:info@gcukltd.co.uk) or visit [www.gceurope.com](http://www.gceurope.com)**
